What is FrogBox

FrogBox

Automated to capture, index and stream live sport with the capability to scale through remote and onsite production services, FrogBox enables sport at any level to become a professional broadcast.

Streaming Kit

All in one streaming kit that is designed for self service and contains everything you need to start capturing your sport.

Video Management & Distribution

Automated video management system and end user match centres. Streaming, mixing, highlights and more.

Live Graphics

Fully automated and highly engaging graphics package that can offer branding and commercial opportunities.

Production Services

As part of a full service model, there are a number of fully contained broadcast and production offerings available.

FrogBox

Why FrogBox?

Fully automated, integrated, end-to-end solution.

Fully Automated

A fully automated solution that doesn't require an operator. The live streaming, graphics and highlights are all powered by our electronic scoring app(s).

Easy to set-up

Lightweight and portable, our video capture kit is built for volunteers. It requires no technical know-how and can be assembled in less than 10 mins.

Premium Experience

High quality footage with broadcast-grade graphics, available to your members and fans instantly via your video centre and native app(s).

CRICKET SCOTLAND
